INDUSTRIAL MAINTENANCE
Industrial ducting hoses/Polyurethane

Applications

A highly flexible and robust ducting.
For use in many industries such as metallurgy, wood working, food, pharmaceutical industries.
Ideal for the conveyance of grains, granules, sawdust and wood chips, metal filings in humid and/or warm conditions.
Specially suitable for street vacuum cleaners and lawn mowers. Options: ideal for flame retardant standard (DIN 4102B1) or antistatic requirements.

Advantages

- n Light and easy to handle.
- n No toxic polyurethane resisting to hydrolysis and microbiological attack.
- n Outstanding resistance to abrasion and piercing.
- n Excellent mechanical flexibility due to perfect cohesion of components (PVC-coated spring steel helix welded to polyurethane wall).
- n Smooth inner tube ensures optimum flow.
- n Good resistance to ozone and ultraviolet light.
- n Good resistance to most of oils, solvents, and industrial chemicals in the vapour phase at moderate concentration.

Technical description

Ether-base polyurethane wall, transparent, smooth inside.
Reinforcement: white PVC-coated steel helix.
Temperature range: - 30 °C to + 110 °C.
Electrical properties: Standard: non conductive.
Option antistatic, $R < 10^6 \Omega/m$: consult us.
Special properties: Abrasion DIN 53516: 40 mm³.
Option flame retardant, DIN 4102B1: consult us.
Halogen and plastiziser free.
Standard/Approval:
EU regulation 2007/19/CE.

Couplings/Fittings

Standard: connexion by clamp.

Complementary information

Technical data for working conditions at 20 °C temperature.
